

Vega Notes – Privacy Policy

This policy explains how Vega Notes handles user data. The app is designed with a local-first architecture prioritizing user privacy.

1. Data Collection

Vega Notes does not collect or store personal data on external servers. All content entered by users remains on their device.

2. Data Storage

All notes, tasks, and related metadata are stored locally using SQLite. No cloud synchronization occurs unless explicitly implemented by the user.

3. AI Processing

All AI processing is performed locally on the device using an embedded language model. No user data is transmitted externally for analysis.

4. Notifications

Reminder notifications are scheduled and managed locally through the device's operating system.

5. Third-Party Services

Vega Notes does not rely on third-party analytics, tracking, or advertising services by default.

6. Data Security

Data security depends on device-level protections such as passcodes and biometric authentication. Users are responsible for securing their devices.

7. User Rights

Users have full control over their data, including the ability to edit, delete, or export information at any time.

8. Data Retention

Data is retained indefinitely on the device until manually deleted by the user.

9. Children's Privacy

Vega Notes is not intended for children under 13. The app does not knowingly collect personal data from children.

10. Changes to Policy

This privacy policy may be updated in future versions. Users are encouraged to review it periodically.
